

# Getting All-Star times to show up.

The reason the all-star times do not show up in the meet program is that meet manager 8 needs to have a session created and all events moved to the session. The steps to do this are as follows:

1. Go to the "Events" menu and within that screen select the "Sessions" menu item.
2. On this screen you need to click the "Add" menu item.
3. This will open a dialog box where you need to enter the following:
  - a. Session #: 1
  - b. Session title: All Events
  - c. Day: 1
  - d. Start time: 09:00 AM
  - e. Interval: 120
  - f. Course: SC meters
  - g. The rest of the fields have defaults that will work
  - h. Click "OK" and then click "Cancel"
4. This will give you an entry in the table at the top of the screen.
5. Click the "Move All" menu item and "Yes" when it asks about moving all events to the session.
6. Exit the "Sessions" screen and the "Events" screen.

This will then allow the All-Star times to show up in the meet program.
